PROFESSIONAL SUMMARY

Full Stack Engineer with backend expertise in Java/Spring Boot and hands-on React.js frontend experience, building production REST APIs, microservices, and LLM-powered features (RAG pipelines, vector search, Google Gemini API) using Spring AI and LangChain4j. Delivered measurable gains in onboarding speed (60%), processing throughput (40%), and system reliability (35%) across backend and AI-integration projects. Seeking a Java Backend Developer role at an MNC where I can scale AI-enabled backend systems.

SKILLS

- **Core Backend:** Java, Spring Boot, Spring MVC, Spring Data JPA, Hibernate, RESTful APIs, Microservices, Python
- **Salesforce:** Salesforce (Administration, Development), Apex, SOQL, SOSL, Lightning Components
- **AI/LLMs Engineering:** Spring AI, Langchain4J, RAG, Prompt Engineering, LLM API Integration, Google Gemini API
- **Database:** SQL (MySQL, PostgreSQL, Oracle), NoSQL (MongoDB), Vector Databases
- **Messaging & Streaming:** Apache Kafka, RabbitMQ
- **DevOps & Tools:** Docker, Kubernetes, Git, Maven, AWS (S3, Lambda), Postman

EXPERIENCE

- **SYMB Consultancy Services Pvt. Ltd** Remote
Software Engineer Intern March 2026–Present
 - Developed and consumed RESTful APIs using Java and Spring Boot/Spring MVC under mentorship, applying backend fundamentals through guided engineering exercises and sample modules
 - Built responsive front-end components and features using React.js, Next.js, and JavaScript, integrating with backend REST APIs as part of full-stack training projects
 - Practiced writing and optimizing SQL queries and working across full-stack modules spanning UI, backend, and serverless components (Vue.js, Nuxt.js, Storybook, Node.js, Express.js, AWS Lambda)
 - Developed a Salesforce Lead Reporting solution using Apex, Scheduled Apex, SOQL, and HTML email templates to automate weekly lead summaries and CSV report delivery.
- **Naval Innovators Pvt. Ltd (Your Exam Sathi)** Hybrid
Software Developer Intern (Backend) December 2024–September 2025
 - Built a KYC (Know Your Customer) verification pipeline in Spring Boot and AWS S3 for onboarding and document validation, cutting creator onboarding time by 60%
 - Re-engineered core backend REST services, lifting content-processing throughout by 40% under production load
 - Tuned SQL queries and resolved production API defects, improving reliability and cutting reported issues by 35%

PROJECTS

- **AI-Powered Fitness Tracker** July 2025
Github Link
 - Architected a 5-service microservice platform (Spring Cloud Eureka, Gateway, Config) handling activity data end-to-end with async processing via RabbitMQ.
 - Java, Spring Boot, Spring Cloud (Eureka, Gateway, Config), RabbitMQ, PostgreSQL, MongoDB, REST APIs, Microservices Architecture, Google Gemini API
 - Designed the service registry and gateway layer to support independent scaling of each microservice, eliminating single-point bottlenecks in the original monolith design.

CERTIFICATIONS

Anthropic (**Claude Code in Action**) — Cognitive Class (**Python 101 for Data Science**) — Cisco Netcad (**Data Analytics**) — KodeKloud (**Docker**) — Google (**Google Cloud 2024**)

EDUCATION

- **ABES Engineering College** Ghaziabad, Uttar Pradesh, India
Bachelor of Technology - Computer Science and Engineering — GPA: 7.92 Decemeber 2022 - June 2026
