EXPERIENCE

- SYMB Consultancy Services Pvt. Ltd**
 - Software Engineer Intern*
 - Spearheading the development of responsive web applications using ReactJs and NextJs, transitioning from a backend-heavy background to a versatile Full Stack role.
 - Implementing NextJs features like Server-Side Rendering (SSR) to optimize application speed and SEO, ensuring high-performance user interfaces.
 - Delivering production-ready code in Agile cycles while rapidly scaling expertise in the JavaScript ecosystem and modern frontend state management.
 - Naval Innovators Pvt. Ltd (Your Exam Sathi)**
 - Software Developer Intern (Backend)*
 - Engineered a KYC REST pipeline using FastAPI and AWS S3, reducing creator onboarding time by 60% through automated document and skill validation.
 - Developed role-based dashboards and QnA APIs, cutting content processing time by 40% and enhancing platform interoperability.
 - Optimized SQL queries and debugged APIs within Agile sprints, boosting reliability and decreasing production issues by 35%

Remote

March 2026–Present

Hybrid

December 2024–September 2025

SKILLS

- Frontend Development:** ReactJs, NextJs, JavaScript (ES6+), TypeScript, Tailwind CSS
- Backend Development:** Java, Spring Boot, Spring MVC, Python, FastAPI, RESTful APIs, Microservices Architecture
- Generative AI & LLMs:** LLMs, RAG, Prompt Engineering, LLM API Integration, Google Gemini API
- Database:** SQL (MySQL, PostgreSQL, Oracle), NoSQL (MongoDB), Hibernate, Spring Data JPA
- Event Streaming:** Apache Kafka, RabbitMQ
- DevOps & Build Tools:** Docker, Kubernetes, Git, Maven

PROJECTS

- AI-Powered Fitness Tracker**
 - Github Link*
 - Description:** Developed an AI-powered fitness tracker using microservices architecture, integrating Google Gemini API for intelligent activity analysis and recommendations.
 - Technologies Used:** Java, Spring Boot, Spring Cloud (Eureka, Gateway, Config), RabbitMQ, PostgreSQL/MySQL, MongoDB, Google Gemini API, Maven
 - Learning Outcome:** Gained hands-on experience in microservices design, AI service integration, asynchronous communication (RabbitMQ), and building scalable AI-driven applications.
 - Gemini-Powered Chat and Recipe Assistant**
 - Github Link*
 - Description:** Built a Spring Boot application using Spring AI, integrating Google Gemini APIs to deliver AI-powered chat and recipe generation functionalities.
 - Technologies Used:** Java, Spring Boot, Spring AI, Gemini API, RESTful Services, Postman, Maven
 - Learning Outcome:** Gained hands-on experience in integrating LLMs with Spring Boot, designing and testing multi-functional REST APIs, and leveraging external AI APIs to build intelligent, user-centric solutions.

July 2025

June 2025

ACHIEVEMENTS

- Earned 12+ Google Cloud Skill Badges** in Generative AI, LLMs, Vertex AI, Dataplex, Cloud Functions, and Infrastructure through Google Cloud Skill Boost.
- Achieved Gold League (10,000+ pts)** in Google Cloud Arcade via Generative AI labs and challenges.
- Earned 5 star in Java & C, 4 star in Python** on HackerRank with **150+ coding problems** solved across LeetCode, GFG, and HackerRank.

CERTIFICATIONS

Certifications: Cognitive Class (**Python 101 for Data Science**), Cisco Netcad (**Data Analytics**), Google (**Google Cloud 2024**), KodeKloud (**Docker**), and CodeChef (**Java for Problem Solving**).

EDUCATION

- ABES Engineering College**
 - Bachelor of Technology - Computer Science and Engineering — GPA: 7.8*
 - St. Aerjay Public School**
 - Senior Secondary (Class 12) - PCM with Computer Science*

Ghaziabad, Uttar Pradesh, India

Decemeber 2022 - June 2026

Bulandshahr, Uttar Pradesh, India

April 2021 - March 2022
