

Kush Chauhan

✎ kush-chauhan.dev  github.com/kush-prog  linkedin.com/in/kushchauhan ✉ chauhankush12345@gmail.com

SKILLS

Programming & Frameworks:	Python, Java, FastAPI, Spring Boot, Spring AI, LangChain, LangChain4j
Generative AI & LLMs:	LLMs, RAG, Prompt Engineering, LLM API Integration, Google Gemini API
Machine Learning & Data:	Scikit-learn, Pandas, NumPy, Feature Engineering, Model Training, Matplotlib
AI Systems & Architecture:	Microservices, Event-Driven Architecture, REST APIs, AI Model Integration
Databases & Infrastructure:	PostgreSQL, MySQL, MongoDB, SQL, Docker, Kubernetes, Maven, Git

EXPERIENCE

SYMB Consultancy Services Pvt. Ltd.

Remote

Software Engineer Trainee

March 2026-Present

- Architecting responsive frontends using ReactJs and NextJs to facilitate seamless user interaction with complex backend AI services
- Implementing NextJs Server-Side Rendering (SSR) and optimized data fetching patterns to handle dynamic, model-generated content with minimal latency.
- Collaborating in Agile sprints to bridge JavaScript-based client applications with scalable AI-driven backend infrastructures.

Naval Innovators Pvt. Ltd (Your Exam Sathi)

Hybrid

Software Developer Intern (Backend)

December 2024-September 2025

- Engineered a high-performance middleware layer using Spring boot to integrate Python-based AI services with a Spring Boot backend ecosystem.
- Developed an end-to-end KYC workflow using AWS S3 and automated validation logic, significantly reducing manual document verification time.
- Refined SQL queries and debugged API endpoints within Agile cycles, improving overall system stability and reliability by 35%.

PROJECTS

AI-Powered Fitness Tracker

[Github Link](#)

June-July 2025

- Description:** Built a microservices-based fitness system integrating LLM APIs for personalized health insights
- Tech Stack :** Java, Spring Boot, Spring Cloud, RabbitMQ, PostgreSQL, MongoDB, Google Gemini API
- Learning Outcome :** AI integration in microservices, event-driven architecture, scalable backend design

ML-Based COVID-19 Analysis

[Github Link](#)

March-April 2025

- Description:**Lead a machine learning project to analyze and predict COVID-19 trends using Kaggle dataset.
- Tech Stack :** Python, Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn
- Learning Outcome :** Learned data preprocessing, feature engineering, and model performance evaluation.

EDUCATION

ABES Engineering College

December 2022 - June 2026

Bachelor of Technology - Computer Science and Engineering

Current GPA: 7.61/10

ACHIEVEMENTS & CERTIFICATIONS

- 12+ Google Cloud Skill Badges in Generative AI, Vertex AI, LLMs, Cloud Functions.
- Gold League (10,000+ points) – Google Cloud Arcade (Generative AI Labs).
- 5 star in Java, C and 4 star in Python on HackerRank with 150+ coding problems solved across platforms.
- Certifications:** Python for Data Science (Cognitive Class), Cloud Computing (Google), Docker (KodeKloud), Career Edge–Young Professional (TCS iON).
